A complete medical treatment for skin disease

# R E V E S K I N™ Melasma Minimizing Tx

- Enhanced by advanced and contemporary skin lightening agents to deliver high efficacy results comparable to Hydroquinone 4% bleaching cream yet with much reduced irritation and risks of complication.
- Conjunctional treatment of R E V E P E EL®
- Can be used as a stand alone product to treat Melasma. Significant results in 28 days. Astonishing Results in 56 days.
- Especially suitable for newly treated skin, dark skin types or extremely sensitive skin.
- PH: 4.0

## Ingredients Highlights

- **Hydroquinone 2%** (also available in Hydroquinone 4% and non- Hydroquinone version)
- **Distinctive® Blueberry:** the newest generation of skin lightening molecule without preservatives concentrated with antioxidants Clinical proven (in vitro and vivo test) higher efficacy and faster results than kojic acid.
- **Botaniceutical DermBrite Complex (Mulberry, Green Tea, Peptides)** Clinically proven 80% reduction in melanin synthesis, 75% reduction in Tyrosinase Activity. A combination natural ingredients clinically proven to inhibit the synthesis of melanin. The anti-inflammatory properties help prevent Post inflammatory Hyperpigmentation associated with dermal treatments and injuries.
- **THD Ascorbate (Vitamin C):** Powerful tyrosinase inhibitor; Stabilize activities of hydroquinone with strong anti-oxidant properties. Clinically proves delivering pure Vitamin C 50 times better than ascorbic acid
- **Licorice Root Extract:** Natural skin brightening agent.
- **Lactic Acid:** an alpha hydroxy acid for skin lightening with moisturizer properties; Less irritating than glycolic acid
- **Polymeric delivery system:** Accelerate the rate skin lightening effects Reduce the required use level of active ingredients
